Letter of Recommendation

I am writing this letter to recommend Mr. [REDACTED] (UID: [REDACTED]) for a Master's program.

My name is [REDACTED] and I have been associated with Sardar Patel Institute Of Technology since 2016. I have known [REDACTED] since 2018 and my interaction with him grew when I taught him courses on *Digital Logic Design & Analysis* and *Machine Learning Lab*. During this period, I have interacted with him closely and found him to be a very intelligent and keen learner. [REDACTED] has maintained an outstanding academic record in my subjects achieving an 'O' grade - the highest possible - in each of them. I am currently teaching him the course *Data Analytics*, and he is on course to achieve an 'O' there too.

While teaching [REDACTED], I have observed that he is a very meticulous person, wanting to explore the depths of every concept taught in his coursework. He believes in learning by practically applying the theory he learns. His extensive assignments and lab work project his sound knowledge and excellent presentation skills. I have perceived his inclination towards learning and developing machine learning models in turn utilizing it in many of his projects in different domains.

In the Data Analytics course, he has shown appreciable skill in PowerBi, Tableau, Hypothesis Testing and Big Data related operations. He is one of the most proactive students in class, and does not hesitate in airing his doubts, which usually analyse the intricate working of the systems taught and often help other students get a different perspective. [REDACTED] has also pursued a rigorous program with Fractal Analytics for Data Science over a period of three years. Besides numerous other projects, he also worked on a capstone project on Analyzing the Indian Premier League across 12 years, which he successfully developed using the knowledge gained in data handling, data visualization and business intelligence. These projects have made him confident in his abilities, which is why he is always looking for newer challenges.

[REDACTED] will be a valuable addition to your cohort, and his breadth of experiences help him contribute wherever he is. His academic performance, aptitude and attitude make him an ideal candidate for postgraduate study. I am sure he will become an excellent computer scientist, and hence, I wholeheartedly recommend him for the masters program at your esteemed university.

Please get in touch with me if you need any further information.
